Education

CEP-CCIT FTUI (Professional Program) 2023 – 2025 | Indonesia
Associate Degree in Information Technology

Asia e University 2023 – present | Malaysia
Bachelor of Information Technology

Professional Experience

PT. Inovasi Sistem Teknologi (INSIST) May 2026 – Present | Jakarta, Indonesia
Network & Full Stack Engineer (Intern)

Insist is an IT infrastructure and enterprise systems company providing end-to-end technology solutions.

- Accelerated internal troubleshooting and issue resolution workflows by building Engineer Hub using Next.js, centralizing client footprints, engineering reports, and technical notebooks in one unified platform.
- Streamlined cross-team handovers and eliminated repetitive issue reporting by integrating an end-to-end ticketing and maintenance history system into Engineer Hub.
- Boosted bookkeeping efficiency and financial reporting speed by developing a Laravel-based Sales Panel that aggregates transaction data into real-time revenue analytics dashboards.
- Ensured high network availability and operational uptime by actively managing internal network infrastructure and conducting on-site network reliability maintenance at LPPOM GHC Bogor.

PT. Aliansi Golongan Kanan (Dexter League) Oct 2025 – Apr 2026 | Tangerang, Banten
Full Stack Engineer

Dexter League is a software startup specializing in custom web and mobile digital solutions.

- Drove platform monetization and user engagement by developing RedCard, a subscription-based premium membership web app built with Next.js and TypeScript for tiered merchant rewards.
- Optimized transaction workflows and automated membership subscription handling by engineering scalable server-side endpoints and dynamic state management.
- Improved system responsiveness and load times through database query optimization and clean API design.
- Enhanced developer velocity and maintainability across the engineering team by enforcing reusable component modularity and structured SDLC practices.

Project & Achivements

POS Matcha Store System
Built a customizable POS and inventory system for MSMEs using Next.js, TypeScript, and Supabase to streamline real-time transactions and bookkeeping.

Wedding Invitation Website
Led the development of a tailored digital wedding invitation platform using Node.js and Firebase with real-time RSVP management.

Prompt Engineering for Software Developers
Dicoding Indonesia
Certified in implementing prompt engineering techniques and AI-assisted workflows to accelerate software development lifecycles (SDLC).

Skills

- Languages: JavaScript, TypeScript, PHP.
- Technologies & Framework: Next.js, Node.js, MySQL, PostgreSQL, Laravel, Git, Supabase, Firebase.
- Tools & Infrastructure: Network Maintenance, VS Code, Postman, Docker, Figma.
- Core Competencies: Full-Stack Architecture, SDLC Management, Technical Documentation, System Integration, Team Leadership.
